About Our Clinic

We exist to serve the dental needs of Foundry residents, other recovery program residents, and people in the community who need access to low-cost, affordable dental care. Thank you for choosing us as your dental provider. Your presence allows us to help others get the dental care they need.

We are pleased to offer a full range of services at this clinic. Please ask us about dental implants. We try very hard to keep our costs low. One way we do this is by using a large number of volunteers. Most of our front desk helpers, for example, are volunteers from local churches and the community. Since they only work on occasion, and because many people here are Foundry residents getting on-the-job training, we are not as efficient as a typical private practice. We ask your patience in this matter. Also, most of our faculty dentists are volunteers as well. Please thank them when you see them for making this all possible!

(over)

Our Fees

Payment is due at the time of service. You can pay ahead for treatment if you wish. Prices for community members are slightly higher than for Foundry residents. We do not accept dental insurance. If you have complex dental treatment needs, please ask about being a patient in Dr. McCracken's private clinic; fees in this clinic are more in line with normal fees charged by dental specialists.

Scheduling & Waiting

Our clinic may run behind due to the challenges of working within the Foundry schedule and serving as a community clinic. When we get to you, we will give you individual attention and non-rushed service. If waiting is difficult for you, or you have pressing time demands, you may be more comfortable in another clinic.

Phones

Patients often have difficulty reaching us by phone. Our phone is constantly tied up with people calling in and asking about low-cost dental care. At this time we are not able to afford a complex phone system with multiple lines, or a staff member to run it. The best way to contact us is to drop by the clinic in person; or, you can email us at FoundryDentalCenter@gmail.com.

Residency Training

Many of our dentists are participating in educational programs, such as our implant training course, or in our Advanced Education in General Dentistry (AEGD) residency program. AEGD doctors spend one or two years in this program following dental school. Other dentists serve as faculty advisors for these residents. Most of our dental assistants are in training.

Consent

"I have read the above and give consent for dental procedures to be performed on me. I understand that some of the care providers are in training. I will ask questions if I have them, and I will commit to regular brushing and home care to keep my teeth in the best condition possible."
